

AquaFlor
PREMIER™

AquaFlor
Plus+™

When it comes to new flooring for your home, there's no need to settle for anything less than updated style and lasting performance. Tarkett's AquaFlor™ collection combines beautiful, realistic hardwood designs with water- and slip-resistant* engineering for durable floors that are both stylish and practical. Its textured surface and easy installation make it an ideal choice for areas in your home where people gather and spills can happen. Kitchens, dining rooms, foyers and other entryways are great places to put Tarkett's water-resistant technology to work.

Tarkett's AquaFlor products are made in the USA with US and global parts.

Indoor Air Quality

FloorScore® and GreenGuard Gold certifications display Tarkett's commitment to supporting optimal indoor air quality. AquaFlor Products are at or below each certification's volatile organic compound (VOC) emissions criteria, ensuring its materials and installation methods contribute to healthier spaces for people and the planet.

Durable

Laminate products with an AC4 Rating are suitable for light commercial use with general traffic.

Easy to Install

Install AquaFlor Products with ease, using Tarkett's simple angle-tap method. Boards click into place on the long side with a traditional angling method. Then use a hammer and tapping block to gently tap the short sides of adjacent planks together and engage the locking system.

These composite wood products comply with TSCA Title VI and CARB ATCM Phase 2 requirements.

* Tarkett AquaFlor Products pass ASTM D2047 for slip resistance.
